Professional Summary

B.Tech Computer Science Finalist (VIT-AP, 8.84 CGPA) targeting an Associate Software Engineer role. Proven track record of building 4+ end-to-end web applications using the MERN stack and FastAPI, with a specialization in seamlessly integrating Machine Learning models into full-stack systems..

Technical Skills

Languages: Python,Java,,C,C++,JavaScript

Core CS Concepts: Data Structures and Algorithms(DSA),Object-Oriented Programming(OOP), Operating Systems, Database Management Systems,Computer Networks, System Design

Frontend: React.js, Vite, Context API, React Router, Tailwind CSS, Responsive Design

Backend: FastAPI, Node Js,Express Js

Databases: MySQL, MongoDB

Tools: Git, GitHub

Education

B.Tech	Computer Science & Engineering, VIT-AP University	2023–2027	CGPA: 8.84
Intermediate	Narayana Junior College	2021–2023	96.1%
10th Grade	Sri Chaitanya Techno School	2021	100%

Projects

Heart Attack Prediction System

[GitHub] React.js | FastAPI | Python

- Built a full-stack Heart Attack Risk Prediction system using a Genetic Algorithm-optimized Random Forest model, achieving 90% prediction accuracy on clinical, demographic, and lifestyle data.
- Improved model performance by 10% over baseline Random Forest through genetic algorithm-driven feature selection and hyperparameter tuning across 15+ health indicators.
- Architected a React.js + FastAPI application delivering real-time risk predictions via RESTful APIs, with average response times under 1 second for end-to-end inference.

MLS – Legal Consultation Platform [GitHub]

React.js | Node Js | Express JS |MongoDB

- Developed MLS, a full-stack law firm website using the MERN stack, enabling clients to browse 10+ service categories and book appointments online, cutting manual scheduling calls by an estimated 40%.
- Designed a responsive React.js frontend paired with a RESTful Node.js/Express.js backend, supporting 5+ API endpoints for appointment booking, service browsing, and firm info — with page load times under 2 seconds.
- Implemented MongoDB for appointment and firm data management, structuring the schema to handle 100+ concurrent appointment records with efficient querying and reliable scalability.

Certifications & Acheivements

Programming Foundations with Python | NxtWave: Core Python programming, object-oriented programming (OOP).

Oracle AI Foundations Associate | Oracle: Foundational knowledge of Artificial Intelligence, Machine Learning concepts.

Introduction to SQL – NxtWave

Foundational SQL including queries, joins, table operations, and data analysis techniques.
